

## **Engineer IV – Cedar/Sammamish River Basin Supervisor**

The position will be located in the River and Floodplain Management Section within the Water and Land Resources Division of King County, Washington. The River and Floodplain Management Section seeks to improve public safety and reduce flood damages through capital improvement projects, targeted acquisition of repetitive loss properties, policy and regulatory recommendations to address flooding problems, and other programs such as public outreach, the county's Flood Warning Center, and technical studies. The position will report to the section manager and is primarily responsible for supervising the Cedar/Sammamish River Basin Team and overseeing the technical engineering, project and program work for a multidisciplinary team of colleagues consisting of engineers, ecologists, scientists and project/program managers in support of the implementation of river and floodplain management projects and programs.

The successful candidate will have a Bachelors of Science from an accredited college or university in civil engineering specifically in the area of hydraulic engineering or river mechanics, environmental engineering, or riverine geology; registration as a professional engineer (P.E.) in the State of Washington; at least seven years of increasing responsibility and ability to work independently and in a team environment using professional judgment in the comprehensive application of open channel hydraulics and modeling, slope stability analysis, bank stabilization design, project and construction management, and permitting requirements towards the design and implementation of flood hazard reduction projects.
