

HDR, Inc.
Water Resources Engineer / Hydrologist
Folsom, CA 95763

HDR is an employee-owned architectural, engineering, planning and consulting firm that excels at helping clients manage complex projects and make sound decisions. Approximately 6,000 professionals, including architects, engineers, consultants, scientists, planners and construction managers, in over 140 locations worldwide, pool their strengths to provide solutions beyond the scope of traditional A/E/C firms.

Description:

HDR Engineering is in search of a Water Resources Engineer / Project Manager to join our growing Northern California team. The primary duties of this position will be to provide technical support for the planning and design water resources related projects. Type of projects will include conducting hydrology and hydraulic analyses, conducting flood hazard assessments, formulation flood damage reduction plans, conducting reconnaissance and feasibility level planning studies, and preparing technical memos and final drainage report documents. The position will also require business development, scoping new work and preparing proposals, scheduling work with subordinates, providing training and reviewing work. Requires strong writing and oral skills, and a track record of completing work on time and within budget. Previous project/client management experience required.

Experience Required:

- Bachelor's degree in Engineering or a related field. Masters preferred.
- PE license preferred
- 6+ years water resources engineering experience.
- Software knowledge should include: HEC-1, HEC-HMS, HEC-RAS, HEC-GEORAS.
- Demonstrated leadership skills.
