

TECHNICAL MANAGER II /III – WATER RESOURCES ENGINEER RENO, NEVADA

Michael Baker Jr. Inc., a division of Michael Baker Corporation, seeks a **Technical Manager II or III (Water Resources Engineer)** for its **Reno, Nevada Office**.

Michael Baker Corporation (<http://www.mbakercorp.com>) provides engineering and operations and maintenance services for its clients' most complex challenges worldwide. The firm's primary business areas are aviation, environmental, facilities, geospatial information technologies, pipelines and utilities, transportation, water/wastewater, and oil and gas. With more than 4,000 employees in over 50 offices across the United States and internationally, Baker is focused on delivering innovative and sustainable solutions for infrastructure and the environment. Michael Baker Corporation is ranked among the top 50 national design firms (ENR 2007).

The Reno water office is Baker's newest office and further proof of Baker's commitment to the West. The Reno office is currently providing support to local, regional, and federal clients in the areas of hydrogeology, hydrology and hydraulics, GIS, and general environmental services. Baker is seeking a senior engineer to provide water resources engineering and design skills, enabling the Reno team to qualify and compete for more complex engineering requirements.

The Technical Manager II or III will be a Senior Engineer with a water resources background. This senior engineer would join an existing Reno water team that already has other non-engineering water resource and environmental skills. For specific projects, the successful candidate would be expected to perform duties as the Project Engineer. Other duties would include staff coordination, strong client contact and the ability to present proposals or findings of various projects in public meetings or other venues.

Requirements:

- Minimum of 10+ years of experience with substantial flood control and water resources projects.
- A background that includes hydrologic and hydraulic design; preparation of reports, plans, and specifications; and water resources planning and engineering studies.
- Project management experience and the ability to make public presentations
- Professional Engineering license in the State of Nevada.
- Bachelor's degree In Civil Engineering (or closely related field)

Preferences:

- Additional desired skills would include; roadway, storm drain, sewer and water system design.
- Water resources engineering experience in Northern Nevada or similar semi-arid environment.
- Professional Engineering license in the State of California is also desirable, but not required

Michael Baker Corporation has a long-standing commitment to the principles of equal employment opportunity. In keeping with this commitment, we will continue recruitment, employment, compensation, terms, conditions, and privileges of employment of qualified persons without regard to gender, race, age, sex, religion, ethnicity, national origin, disability, veteran status, sexual orientation, or any other category protected by applicable federal, state, or local law. Individuals shall be judged solely on their job-related aptitude, training, skills, and performance.

We strive to instill a set of Core Values that include *Safety, Customer Commitment, Valuing Our People, Open and Honest Communications, Teamwork and Innovation.*

Baker offers an excellent benefits package that includes: Medical, Dental, Vision, Disability Insurance, Life Insurance, Flexible Spending Accounts, Additional Paid Time Off, Flex-Time, 401-K Retirement Plan, Tuition Reimbursement, Employee Credit Union, and Savings Bond Purchase Program.
