

Stormwater Quality Project Manager

Our Irvine office is seeking a **Stormwater Management Project Manager** who specializes in stormwater quality compliance and NPDES permit requirements. Projects include both public and private sector clients in the development of Stormwater Management Plans, involvement with Best Management Practices (BMP) research and design, and NPDES permit (municipal, construction, and industrial compliance). Familiarity with preparation of stormwater quality reports and NPDES stormwater program requirements for municipal and construction activities. The Project Manager will work with a team of engineers and stormwater specialists, and will lead and mentor junior staff.

The position requires a Bachelor's degree in Civil Engineering, a minimum of 8 years professional experience, California Professional Registration, and exceptional written and oral communication skills. Certified Professional in Erosion Control (CPESC) or Certified Professional in Stormwater Quality (CPSWQ) is desirable, but not required. Ideal candidate will have working knowledge of NPDES program, stormwater hydrology, hydraulics, and treatment control BMP selection and design.
