

Water Resources Project Manager, WEST Consultants, Inc., Sacramento, CA

We are currently looking for a senior engineer as project manager with significant experience in open channel hydraulics, ground and surface water hydrology, sedimentation and erosion, water quality modeling and river mechanics.

MS or Ph.D. preferred.

Familiarity with numerical modeling, particularly HEC models and other 1 and 2-D codes a plus.

We are expanding operations in northern California to better serve our clients in California and the nation. We continue to seek clients who make us dig deep, who challenge us to innovate, and force us to use every ounce of our talent. We are adding inspiring people, working on thought-provoking projects with exciting clients.

Send a resume and cover letter to: hrm@westconsultants.com.
